Mission

Our mission is to provide top-tier Invisible Grills, Mosquito Nets, and Zip Screens without compromising on affordability for our customers. Our goal is to become your reliable provider of must-have home netting basics.

Vision

At Devaaj Enterprises we redefine modern living space through safety & style with a quality design. We primarily develop items that are aesthetically pleasing but also ensure security and comfort to users. We are passionate about bringing quality of life through our products based on advanced home safety and contemporary designs.

Values

Unwavering Quality Commitment – We never compromise on the quality of our products.
Respect for Every Individual – Each client and team member is valued and respected.
Continuous Improvement – We are always seeking ways to surpass our own achievements.

INVISIBLE GRILLS

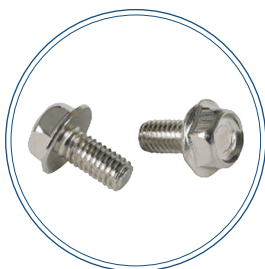

**Unleash fresh air with uninterrupted balcony views.
Devaaj invisible grills safeguard homes through invisible
protection and visible measures.**

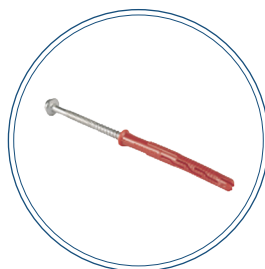

Materials Used

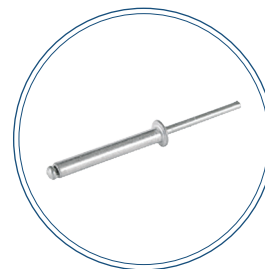

- 316 Marine-Grade Stainless Steel- enhances strength, exemplifies elegance
- SS316 Nylon Coated Cable- adds sturdiness and reliability
- 6063 Grade Aluminium Channel- prevents corrosion
- SS304 Grade Fixing Anchors and Screws- provides extra stability
- SS316 Cross Clip-provides durability

OR

HORIZONTAL

Channels

Material

Aluminum Alloy: Lightweight and corrosion-resistant, often anodized or powder-coated for additional protection and aesthetics.

Stainless Steel: Provides extra strength and durability, commonly used in high-stress installations.

Customer Color :

Black

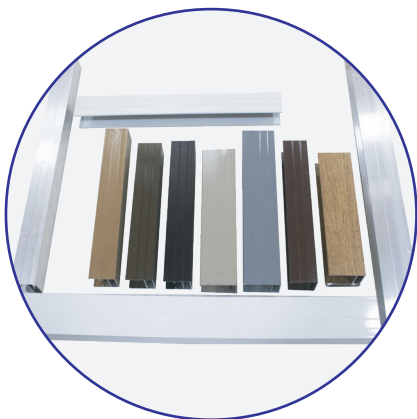

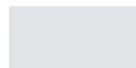

Brown

Grey

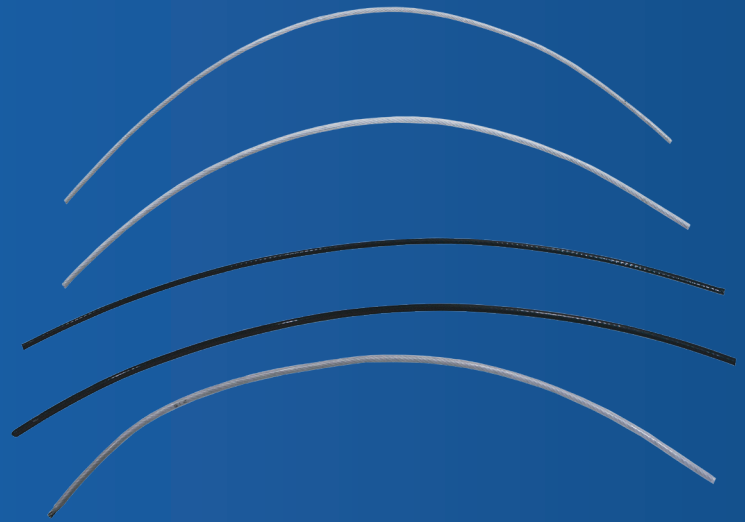

White

- Heavy Weight Aluminium Alloy.
- Stainless steel bolt with Nylon Washer
- Bolt Space : 50 MM, 75 MM, 100MM
- Wall Thickness : 1.5MM, 2MM.

Wire Comparison :

Wire Thickness

Devaaj Invisible Grills:

Wire Diameter: [0.5 mm and 1.5mm]
 Characteristics: High tensile strength, designed to blend seamlessly with the environment while offering robust safety features.

Competitors :

Wire Diameter: [1.2 mm, 2.2]
 Characteristics: Generally thinner, which may affect strength and durability.

Wire Material

Devaaj Invisible Grills:

Material: Stainless Steel (304 or 316 grade)
 Benefits: Excellent corrosion resistance, high durability, and long-lasting performance. Competitors:

Competitors :

Material: Varies (mild steel, lower grade stainless steel)
 Benefits: Potentially less resistant to rust and corrosion, which can impact longevity.

Two thin, dark, curved lines on the left side of the page, arching upwards and then downwards.

Wire Design

Devaaj Invisible Grills:

Design: Multi-strand wire configuration for added strength and flexibility.
Aesthetics: Designed to be minimalistic and unobtrusive, maintaining visual clarity.

Competitors :

Design: Single-strand or less refined configurations.
Aesthetics: Can be more noticeable and less integrated into the design of the building.

Durability & Strength

Devaaj Invisible Grills:

Durability: High impact resistance & tensile strength due to superior material and design. **Warranty:** Longer warranty period reflecting confidence in product longevity.

Competitors :

Durability: May have lower impact resistance and tensile strength. **Warranty:** Often shorter, indicating potential concerns about long-term performance.

Maintenance & Cleaning

Devaaj Invisible Grills:

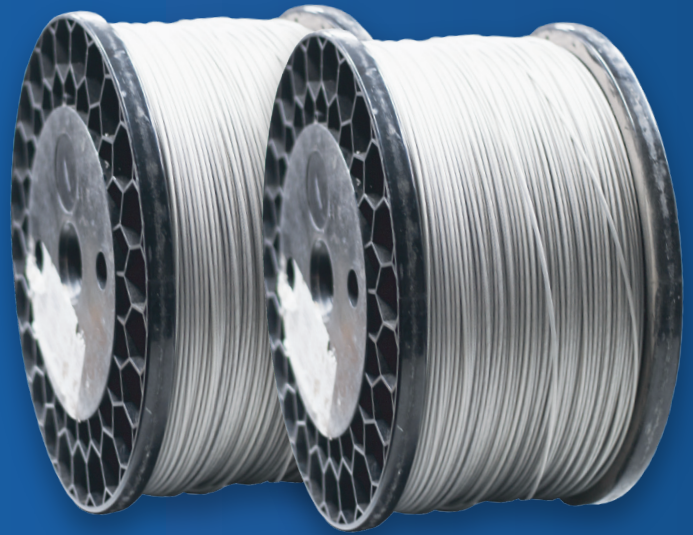

Maintenance: Low maintenance required due to high-quality stainless steel that resists rust and staining.
Cleaning: Easy to clean with minimal effort.

Competitors :

Maintenance: Higher maintenance might be required if using lower-grade materials.
Cleaning: May require more frequent cleaning and care.

Wire Type :

Invisible grill wires are thin, high-tensile stainless steel cables used for safety and security purposes, typically installed on windows, balconies, and other open areas. They are designed to provide an unobtrusive barrier that maintains the aesthetic appeal of a space while ensuring safety. The wires are often coated with a protective layer to resist corrosion and enhance durability, making them suitable for various environmental conditions. Their transparency allows for unobstructed views, ample ventilation, and natural light, making them a popular choice for modern architectural designs.

Black

Natural

Stainless Steel Grades :

Wire Design

SS304 (AISI 304)

Composition: Contains 18–20% Chromium and 8–10.5% Nickel.

Properties: Good corrosion resistance, more affordable, widely used in indoor applications.

SS316 (AISI 316)

Composition: Contains 16–18% Chromium, 10–14% Nickel, & 2–3% Molybdenum.

Properties: Superior corrosion resistance (especially against chlorides & industrial solvents), ideal for outdoor & harsh environments.

Wire Diameters

0.5 mm Diameter

Strength: Offers a balance between visibility and strength. Suitable for applications where a less obstructive view is desired while maintaining safety.

1.5 mm Diameter

Strength: Stronger than 2 mm wires, providing enhanced safety. It is still relatively unobtrusive but offers more security against potential impacts or attempts to breach.

Functionality

Unobstructed view and airflow

made with thin and nearly transparent bars, Devaaj invisible grills allow the flow of air while letting you enjoy a clear view of surroundings.

Easy maintenance

being easy to clean and resistant to corrosion, invisible grills require minimal maintenance.

Safety and security

the sturdy construction provides an extra layer of security by acting as a barrier to prevent falls

Aesthetic design

the sleek and modern design of invisible grills can fit any living space, making it visually appealing
